EXPERIENCE

Software Developer Intern
Dispatch For You Corporation

March 2023 - present

- I have recently joined the Dispatch For You team , where I am currently working on MVP- Gravitii(gravitii.xyz). I am improving gravitii homepage UI components. Additionally, I am working on the gravitii's backend infrastructure .My main skills on this product involve React, Postgresql ,FastAPI, UI/UX Design. This project involves working closely with our product team to bring innovative features to market, while ensuring that the platform remains scalable and performant. I am constantly exploring new technologies and methodologies to improve our development process and deliver value to our users.

PROJECTS

Image Search App : Built in React with the help of Unsplash API. It returns the images on the webpage according to user input([Deployed Link](#))

E-shopping Website : An eshop website that resembles amazon. Built with React.js and firebase ([Deployed Link](#))

Portfolio Website : My Portfolio Website which showcases my skills, projects and other important things related to me. Built in React , it uses Email.js, bootstrap, and tons of other designs ([Deployed Link](#))

Review Posting Website : A website that allows users to Post Review of anything in 400 words. Built in React ([Deployed Link](#))

Instant Notification App : A React app which shows instant notification when someone likes,share or comment on your post. Built in React using socket.io ([Link](#))

Other Projects [Github](#)

COMPETITIVE PROGRAMMING

- Actively Participates in Competitive Programming contests on codeforces, atcoder and leetcode. [codeforces id](#) [Atocder id](#)

EXPERIENCES AND ACHIEVEMENTS

- Contributed toward finding bugs in several websites. Listed in Hall of fame of EXIM [account shreepatiha](#)
- Founded IIIT Kottaym coding club along with 4 other students
- Problemsetter in Intra IIIT kottayam coding contest
