Ongole, Andhra Pradesh

TECHNICAL SKILLS

Language : C, HTML, CSS, Java, Python
Developer Tools: VS Code, Eclipse, IntelliJ IDEA
Technologies/Frameworks: Flutter, GitHub

PROJECTS

Human identification using Gait Recognition Recognition Conducted research on various computer vision and machine learning methods for identifying individuals based on their walking patterns. Analyzed the strengths and limitations of each method and evaluated their performance on publicly available data-sets. Currently working on developing a novel approach that combines multiple techniques for improved accuracy and robustness

India's Culture and Heritage Developed a web page that explores the greatness and culture of India and its states. The web page showcases famous places, history, and cultural heritage of various Indian states, providing a platform to explore and learn about India's rich cultural diversity. [website-link](#)

Find the Odd Game Developed a web-based game called "Find the Odd" that allows users to find the differences between two similar images. [webiste-link](#)

EXPERIENCE

Intern Jan 2023 - Ongoing
komhar Products

- As an intern on a website conversion project, I worked on the backend using Python to develop a tool to convert ETL files.
- I collaborated with a team of developers to build an efficient and reliable system for file conversion.
- Through this internship, I learned valuable skills in software development and contributed to a project that will improve the efficiency of data conversion for businesses.

freelance Oct-2022 - Ongoing
Chegg Expert

- As a Chegg Subject Matter Expert in Other Math, I provided online tutoring services, helping students with their math problems and offering detailed explanations.
- This role allowed me to share my knowledge and help students achieve their academic goals.

ACHIEVEMENTS

- Achieved 217th rank in SnackDown 2021 - Elimination Parallel, an international coding competition organized by CodeChef
- Ranked 3248th globally in Google Kick Start 2021, a coding competition by Google that attracts participants from around the world
