**Hacker Earth

Chakka Ranga Nandan Sresty

To work in an organization which provides me with ample opportunities to enhance my skills and contributing to the growth of the Organization.

PROJECTS

GRE Tunneling

The Project is basically acts like a VPN.To implement it we have used the Concept of GRE Tunneling and RIP Routing Protocol.
Technologies Used:-Computer Networks(RIP,GRE Tunnel)

Movie Recommendation and Review :-

The main idea is for cinephile people who know the genre but couldn't find a good movie to watch the sites helps those people figuring it how. Once they watched the movie they can rate the movie. Also, they can see in which OTT platform the movie is available.They can also find the detailed view about the cast and the other movies the cast did.
Developed the Site and Login Page
Technologies Used:- MongoDB,Bootstrap4,NodeJS

Collaborate Coding:-

This is a online code sharing platform where multiple users can edit the code the run it and a black board also available to explain and present their ideas on it. This one is similar to Google Docs. So the users can talk and video call in this site to get a better understanding of the implementation of code.
Developed Black Board and Login page
Technologies Used:-HTML,CSS,JS,React,Socket.io, Python

EDUCATION

2018 - Present — **Dayananda Sagar Collage Of Engineering - 8.23**
Computer Science(B.E) - Bangalore - Karanataka
